2. **ASSUMPTIONS:** Those affecting AAPE

The APS has made a study of the future for their Long Range Plan. What are your beliefs about:

Assumptions (Based on APS LRP)	Within 10 yrs?	Within 25 yrs?	Never Happen
1. Much of what APS (and AAPE) does now in the physical world will move to the virtual world: e.g., publishing printed magazine			
2. Much of what APS does now in the physical world will move to the virtual world: e.g., philatelic exhibitions (Stampshow, etc.)			
3. 100% of our Members will have access to information technology in whatever form it will be delivered.			
4. Stamp collectors and exhibitors will still enjoy friendships and interacting with others, but this may be done more frequently though digital media.			
5. Membership in organized philately may decline substantially as current membership ages.			
6. New people will enter the hobby, but maybe not enough to sustain current membership levels.			
7. Technology will evolve to the next generation, involving more integration and more pervasive personal delivery across multiple platforms.			

List any assumptions/trends that you foresee which will affect our hobby and are not covered by the list above:
