

SYNOPSIS
THE TRUCIAL STATES
Palm Trees and Dhow Series of 1961

Treatment: In today's collecting circles, the term "sand dune countries" (or just "dunes") pertains to the thousands of controversial issues emanating between 1963 and 1972 from some of the seven independent sheikdoms (Abu Dhabi; Ajman; Dubai; Fujeira, Ras al-Khaima; Sharjah; and Umm al-Qiwain) which now comprise the United Arab Emirates. Yet this flood all started innocently enough with the issue of just 11 stamps—The Trucial States Palm Trees and Dhow Series of 1961. **This exhibit will show stamps, cancellations and covers of the first and only Trucial States issue.** Although extensively used, surviving examples of used Trucial States stamps and commercial, private and philatelic covers are scarce. The single air letter sheet issued by the Trucial States is beyond the scope of this exhibit.

Importance: Postal service in the Trucial States, originally known as the Pirate Coast but later the Trucial Coast, began on 19 August 1909 with the opening of an Indian Branch Post Office in Dubai. From its original opening in 1909 until 1961, Indian, Pakistani and British stamps were used in the Dubai Post Office without any indication of the name of the state. In anticipation of the probable establishment of postal services in the other six emirates as well as an attempt to quell rising Arab nationalism, officials for the British Postal Agencies in the Persian Gulf prepared a new issue intended for general use throughout all the Trucial States—the Palm Trees and Dhow Series of 1961. Because of local politics—the ruler of Abu Dhabi objected to the different heights of the palm trees, implying that some sheikdoms were more important than others—and because Dubai still remained the **only** post office in all of the Trucial States, **this issue was used only in Dubai from 7 January 1961 to 14 June 1963**, although Trucial States stamps remained valid in independent Dubai until 30 September 1963.

Philatelic/Subject Knowledge: I contacted Thomas De La Rue, London (who had also acquired Harrison and Sons in 1997) for additional information regarding essays, proofs, color trials, etc, only to find that their archives had been sold off years ago. Some of this material ended up at the University of Reading in the UK; however, none of it pertains to the Trucial States issue. Elements of the De La Rue archive digitized and reprinted in book form by The Royal Philatelic Society London yielded only a picture of the recessed high-values in corner blocks of four along with perforation size and first day of use but without plate numbers or marginal inscriptions.

Next, I contacted the British Postal Museum (BPM) in London. **The BPM houses most all of the recorded pre-production material pertaining to this issue (color essays; imperforate registration sheets; and original intaglio printing plates).** They did, however, provide information on dates and quantities of stamps printed and location of printer's guidelines.

Commercial covers can provide social, cultural and economic context so companies sending and receiving mail franked with Trucial States stamps were checked on-line to see what was actually being bought and sold in Dubai. In most cases, trading companies dispatching mail from Dubai in the 1960's still exist. A history of the British Bank of the Middle East (BBME), *the* bank for Dubai, and the web site for the Hong Kong and Shanghai Banking Corporation (who purchased the BBME) were reviewed for the role of trade in the Dubai economy and an understanding of export bills, the primary means of payment between the exporter and the purchaser in Dubai. **A thorough understanding of Dubai trading patterns allows one to readily identify philatelic or contrived covers.**

Personal Study and [Original] Philatelic Research: Postal rates for the Gulf Agencies in annas are readily available from the BPM. However, on 1 April 1957, the Indian Overseas Rupee was decimalized to where 100 naya paisa (np) equaled 1 Rupee. Available postal rate information for Dubai does not begin until 1966, three years after postal independence, leaving a postal rate "hole" for the period 1957 to 1966, which includes the

entire period of use for the Trucial States issue. Since 1 anna = 6.25 np and 100np = Re1, the entire rate chart provided by the BPM was converted by the exhibitor to naya paisa and rupees. In many cases, rounding up or down had to occur in order to match the value of the existing stamps. As an example, the former ½ oz airmail letter rate to Europe of 6 annas became 37.5 np, rounded up to 40 np, the rate shown on all covers to European destinations. The accuracy of rounding up or down was validated by the study of all covers in the exhibitor's possession, covers shown in *The Arabian Gulf States Postal History Quarterly*, Editions 20 (Autumn 2006) and 23 (Summer 2007), and covers sold on eBay. **Postal rates for this area still remain largely unexplored but the rate table developed by the exhibitor and shown on page 8 is believed to be the most current and accurate available.** Even so, rates cannot always be reconciled with the franking on covers as genuine errors by the sender or postal staff frequently occurred. Moreover, some surface rates on the table were seldom, if ever, used and examples on cover have never been reported. Parcel cards bearing the high-value rupee stamps are known to exist but are seldom seen.

Rarity: This one-frame exhibit contains twice the number of Trucial States covers (17) of any prior FIP exhibit on this topic; there is no equivalent US exhibit on this Trucial States issue. Like the postal rate "hole" for this issue and time period, there is also a correspondence "hole" and Trucial States covers are hard to find. Dubai originally had a marginal subsistence economy based on pearls, date palms, camels and fishing and literacy rates were low; oil was not exported until 1969. **Tourism was not allowed**, hence the general absence of post card "tourist" mail. Yet Dubai was also *the* center for the carrying and entrepôt trade on the Trucial Coast and **most mail from Dubai was commercial in origin** from individual trading companies or banks, much of it to the UK (the sheikdoms were classified by the Foreign Office as "independent emirates under British protection") or elsewhere in Europe. **Mail to the Subcontinent exists but most covers have not survived**; ones that do surface are in generally poor condition. With some exceptions, **many covers to the US are philatelic. Commercial or personal letter mail within Dubai is practically non-existent** as there was no home-delivery.

Key Items: (1) Two covers from the Resident Political Agent in Dubai to family in the UK; (2) SPECIMEN overprints on the entire set; (3) used block of eight Rs2 stamps; (4) private correspondence post card to Aden; (5) Ras al-Khaima government cover; and (6) an independent Dubai mixed franking cover.
